

Designed right . . . built right to painstakingly precise specifications for long-lasting trouble-free continuous operation. After years of research by leading technicians and specialists in the industry, the L&F Portable Cine Processor has been specifically engineered for industry, TV stations and schools where it is practical and economical to process Black and White film lengths up to 200 feet by reversal, negative or positive. Plumbing is not needed in the operation of this unit. No other processing machine offers the versatility, portability and economy. Every moving part has been scientifically tested to assure the absolute in performance; the all-metal processor is easy-to-load, easy-to-handle, requires less than 64 ounces of solution. The quality construction of the L&F Processor guarantees fast, precise, fully automatic operation.

NEW! IMPROVED!

## L & F PORTABLE 16MM CINE PROCESSOR FOR SOUND OR SILENT FILM

★ DAYLIGHT OPERATION

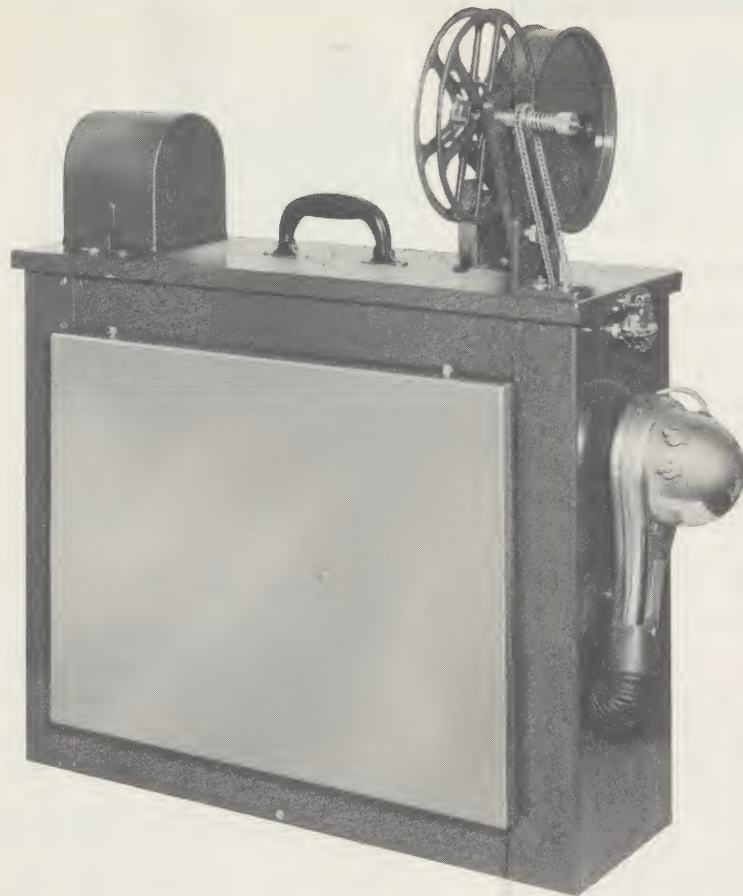

★ FULLY AUTOMATIC

★ NEGATIVE or POSITIVE

★ REVERSAL PROCESSING

★ NO PLUMBING REQUIRED

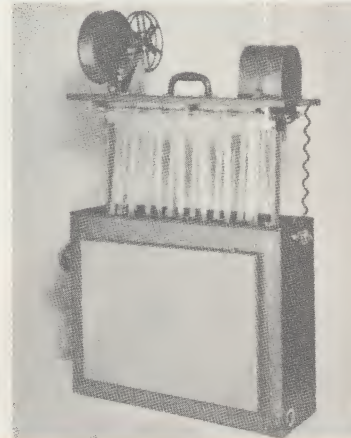

## L & F CINE PROCESSOR

The L&F Portable Film processor is a low-priced, completely portable, precision-made automatic reversal processing machine. It operates on conventional AC current and requires no plumbing fixtures or attachments. This fool-proof, sturdy, all-metal processor is designed to last for years of continuous service. The 10 stainless steel solution tanks hold a maximum of  $\frac{1}{2}$  gallon of solution which will process up to 200 ft. of 16mm (or 8/8mm) B & W film in less than one hour. Tanks can be removed, drained and refilled in less than 5 minutes. Unit is compact (9"x32"x24"), lightweight (55 pounds) and portable. Film is uniformly dried by a continuous flow of warm air. An automatic micro-switch stops machine after film is processed. Although designed specifically for on-the-spot Reversal processing, the L&F Portable Cine Processor may be used for negative and positive processing.

### PORTABLE

The L&F Cine Processor weighs only 55 pounds and can be conveniently used anywhere it is needed. Ideal for "on location" processing jobs. Compact for easy storage. Convenient carrying handle insures ease of portability.

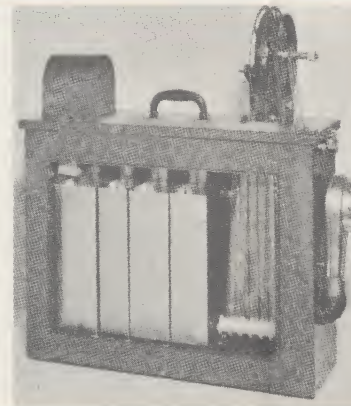

### DAYLIGHT OPERATING

Can be loaded and operated in broad daylight. No darkroom is required. Operates on conventional 110V current and requires no plumbing fixtures or attachments.

### ECONOMICAL

Requires less than 64 ounces of solution to process two-200 ft. rolls of 16mm Black and White film. Film comes out processed and dried in less than one hour. Uses conventional AC outlet. Requires no plumbing.

### SPECIFICATIONS

32" long, 9" wide, 24" high. **Net Weight** 55 lbs. **Shipping Weight** 65 lbs. **Processing Speed** 4 ft. per minute. **Developing Temp.** 80°. 10 - Stainless Steel Solution Tanks. **Electric Power** under 600 watts; can be plugged into any 110V outlet. **Plumbing**, none required. **Instructions**, Complete Manual of Operation and Maintenance.

**Delivered complete** — ready for instant use. Reversal chemicals included.

Thank you for your request for additional information on the L & F PORTABLE CINE PROCESSOR. We are enclosing herewith a descriptive circular which will enable you to determine whether or not this unit fits into your type of requirement.

Exhaustive tests have been made with the unit. It is capable of processing reversal film and negative film. When processing reversal film, all ten tanks are used conventionally. When the processing of negative film is required, follow the instructions set forth for tank arrangement for this type of processing.

It is impossible to stress the convenience and versatility of this unit. It is designed so that each 200 foot roll of film is processed in approximately one hour. This film comes out of the machine completely dry and ready for screening, no plumbing connections are required. The washers in the tank are adequate for the processing of the film. The PROCESSOR may be loaded in daylight. It comes to you completely threaded with leader so that all that is required is that you fasten the end of the film to be processed to the end of the leader in the light type magazine and start the machine.

We feel that you will be more than pleased with the operation of the PROCESSOR which requires only a conventional AC outlet.

Very truly yours,

SUPERIOR BULK FILM CO.
